

Safety in Numbers – Slips and Trips  
[www.safetyinnumbers.ca](http://www.safetyinnumbers.ca)

Slips and trips are one of the largest causes of lost time injuries. The following are examples of slips and trips hazards seen in actual workplaces.

General Clutter you have to walk around

Loose Material on Floor

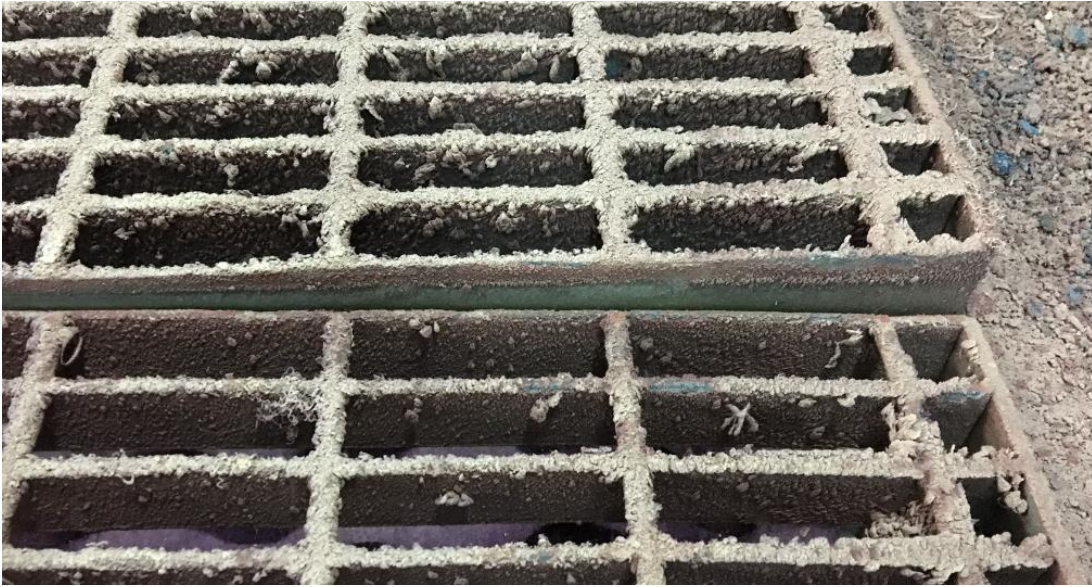

Even Worse – Loose Material on Stairs

Loose Edge on Flooring

### Downdraft Booth Grates Coated with Paint don't Lie Flat Anymore

Height Transition as you step outside. And poor lighting at Night!
